

Notice 01-001

19 April 2001

It has come to the attention of the Foundation that some of the following FEBCO assemblies have been sold with differential pressure relief valve discs made of silicon elastomer material. The assemblies affected include the following:

Reduced Pressure Principle Assemblies

Model 860 – 2-1/2", 3", 4", 6", 8"

Model 880 - 2-1/2", 3", 4", 6", 8", 10"

Model 880V - 2-1/2", 3", 4", 6", 8", 10"

The Approved elastomer material for these assemblies is EPDM, which is black in color. The unapproved silicon material is red in color, so it is easily identified.

The subject assemblies containing the red silicon relief valve discs are not approved by the Foundation.

Should you have an assembly affected by this situation, please contact FEBCO at (559) 252-0791 for Foundation Approved replacement components.
